### New Products!

#### Grain & Edge Filler - M607-1006 Quart; M607-1007 Gallon

Mohawk Grain & Edge Filler is a fast dry, water-based wood filler that can be used as a grain filler on open pore wood or as an edge filler to pre-fill routed or shaped edges of MDF panels. Mohawk Grain & Edge Filler will accept stain colors.

- Water based, non-flammable
- Zero VOC
- Dries fast
- Sands well
- Takes stain well
- Cleans with water
- If product becomes dry or you want to thin, add drops of warm water
- If product freezes, simply let it thaw before use

Mohawk Grain & Edge Filler must be sealed with a wet coat of lacquer sealer or vinyl sealer. **DO NOT SELF SEAL WITH CONVERSION VARNISH OR PRE-CAT LACQUER!!**  
After being sealed, Grain & Edge Filler accepts any varnish, urethane, wax, polish, lacquer, linseed, tung and various other oils.

The Hydro Care Wood Floor System

Hydro Cleaner Wood Floor Cleaner - M730-30006 - Quart

Hydro Cleaner Wood Floor Cleaner is a ready-to-use, environmentally friendly cleaner and wax remover for sealed laminate and hardwood floors. Apply by spraying a light mist of product and remove with a very light floor abrasive pad or a floor mop. Heel marks and heavier dirt marks can be removed with a cloth soaked with Hydro Cleaner.

Hydro Care Wood Floor Protector - M730-30016 - Quart

Hydro Care Wood Floor Protector is a water-based, environmentally friendly, wax maintenance product that can be used on all types of wood. Hydro Care is intended to even up (refresh) the appearance in the traffic areas of the floor while providing a thin, soil resistant protective coating.

Natural Wax Care For Natural Oiled and UV Cured Oil Floors M730-30025 - Pint

Natural Wax Care is applied to natural oiled floors to freshen up the surface by providing a new impregnation of oil with a silky sheen finish. Natural Wax Care is used when surfaces are showing scratches or if there are some wear spots on the floor surface.

### Bondo® Wood Filler - M743-5002 Quart Bondo® Red Cream Hardener - M743-5003 2.75 oz.

Bondo® Wood Filler can handle any wood repair ranging from the smallest to the largest of projects; filling in minor furniture damage or rebuilding a missing piece of wood. When the filler and hardener are mixed, a reaction occurs which allows the filler to chemically bond to the repair surface and allows the product to cure quickly and adhere permanently. For more advanced repairs, the filler can be applied in layers to rebuild rotted or missing pieces of wood. Bondo® Wood Filler is water resistant and will not shrink. You can make professional, great looking repairs.

Common applications or damaged areas include:

- Window sills
- Furniture
- Exterior wood trim such as door frames and jambs, soffits and fascia
- Cabinets
- Decks
- Garage doors
- Wood floors and stains
- Siding
- Exterior wood columns, doors and flower boxes
- Interior doors, baseboards and more

Medium brown in color when mixed, Bondo® Wood Filler is stainable and paintable, making it perfect for almost any wood surface inside or outside. The filler can be easily sanded by hand or power tool in only 15 minutes and stained or painted in only 25 minutes, meaning the repair is complete the same day you started. The strength of this 2-part wood filler allows you to rebuild rotted or missing pieces of wood and make repairs that last.

Filter Coatings

Good habits are essential to have when finishing but because of time and other reasons many are often overlooked. People almost always remember to stir well before using a coating or to blow off dust before applying the next coat.

However, one good habit that is not always seen is straining or filtering coatings before they are applied. This oversight can lead to less than professional results. No one wants to see trash, dirt or other debris in their finish.

For the cost of an inexpensive paper filter you can make sure that any dirt specks, gels, flattening agents or dried paint stays out of your coating. For the best results, take the time to make sure that the finish will be as clean as possible before spraying.

Mohawk offers paint strainers in a 12 pack (M972-1001) or in a 250 pack (M972-1002). For as little as \$0.20 or less, you could easily improve the look of your finish.

Manufacturers, including Mohawk, filter products as they are being filled into their containers but taking the extra step to strain the material before use is an excellent habit to form. Most shops are not dust free environments, so after opening a new can and while stirring the product it is possible for debris or dried particles to fall into the coating.

Remember, **Always filter your sealers and topcoats.**
